

**Atelier “Systèmes d’information et outils de pilotage du secteur
élevage dans les pays du Sud”, 11-13 juillet 2011**

Questions raised by the setting up of a Livestock Policy Monitoring System in Vietnam

Guillaume DUTEURTRE
Pascal BONNET
Vu Trong BINH
Pham Duy KHANH

Context

- Transformation of the livestock sector
 - Production techniques
 - Farm structures
 - Organization of marketing chains

- Drivers of those transformations
 - Market forces and private firms
 - Public regulation ← ??

How to feed growing markets?

Which quality for which market ?

**What type of environmental risks
In specific areas?**

What prospects for family livestock production ?

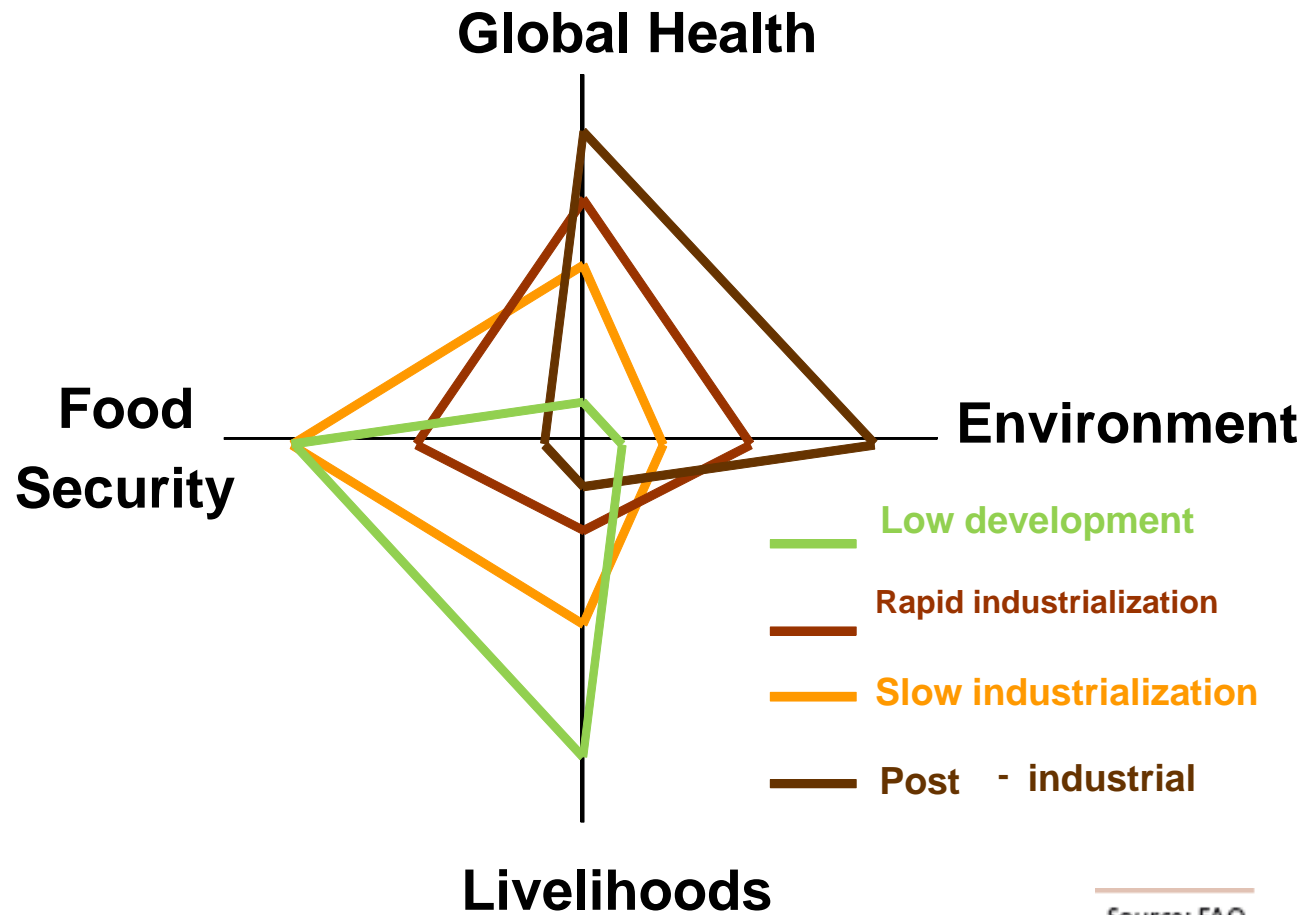

How to regulate industrial investments ?

Context

- Concerns ?

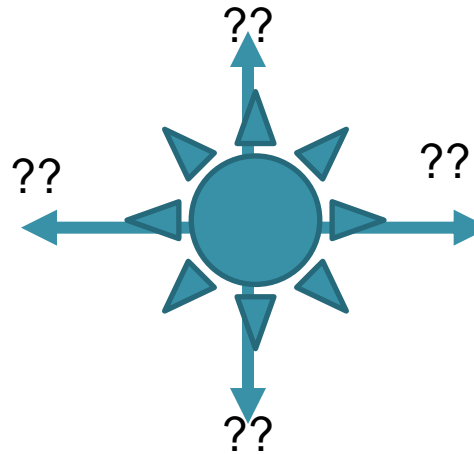

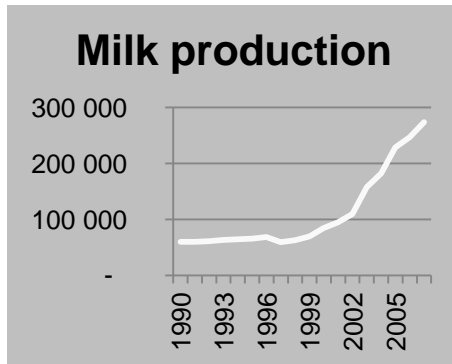

Context

- Concerns ?

Health and food safety

Economy and food security

Environment

Livelihoods

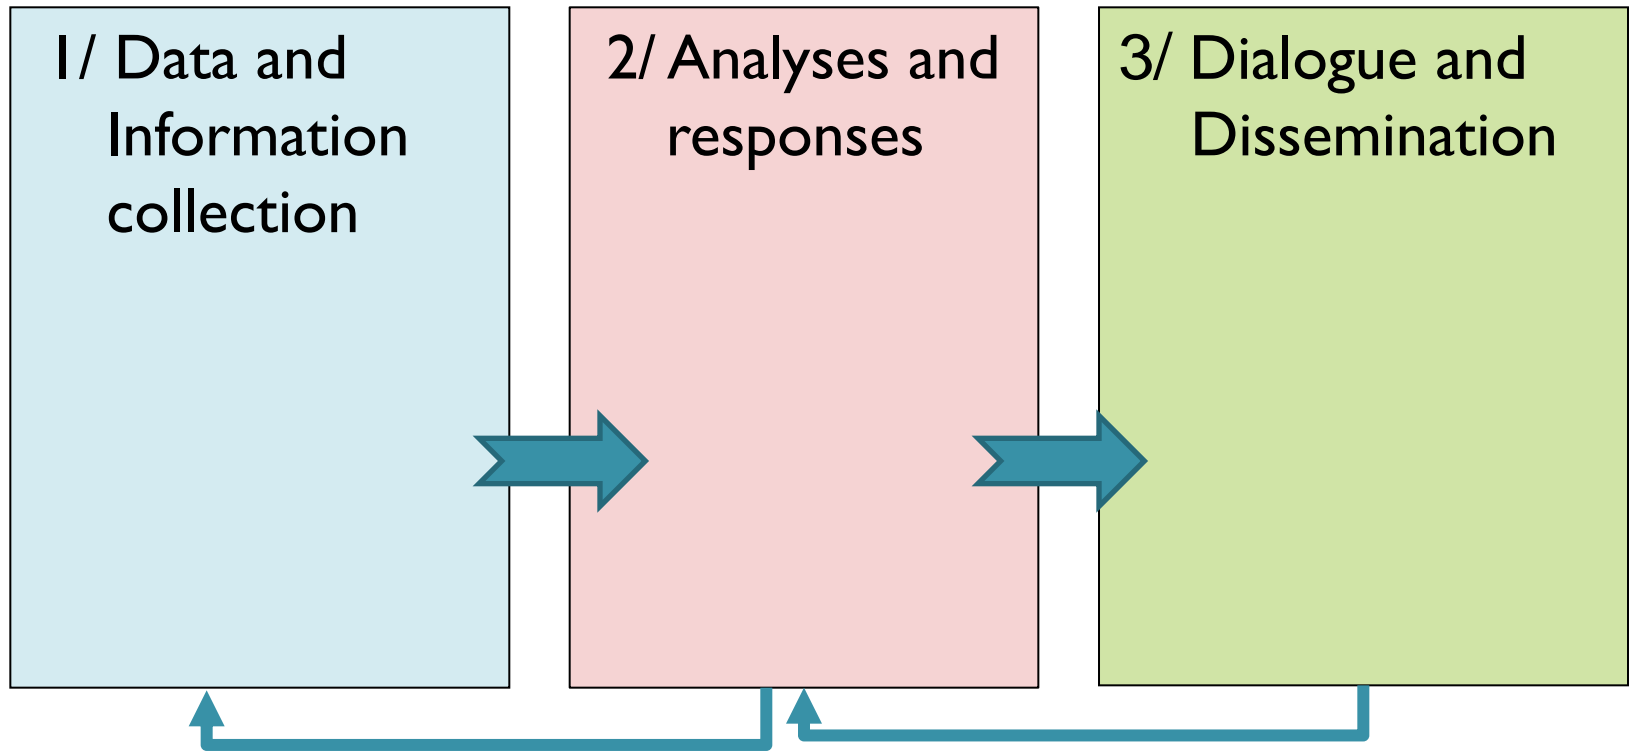

Objectives

- A **livestock monitoring system**, what for ?
 - To facilitate research networking
 - National
 - International
 - To better understand processes of change
- But also...*
- To improve research-development linkages
 - To inform public decision makers
 - To generate a new vision on livestock development

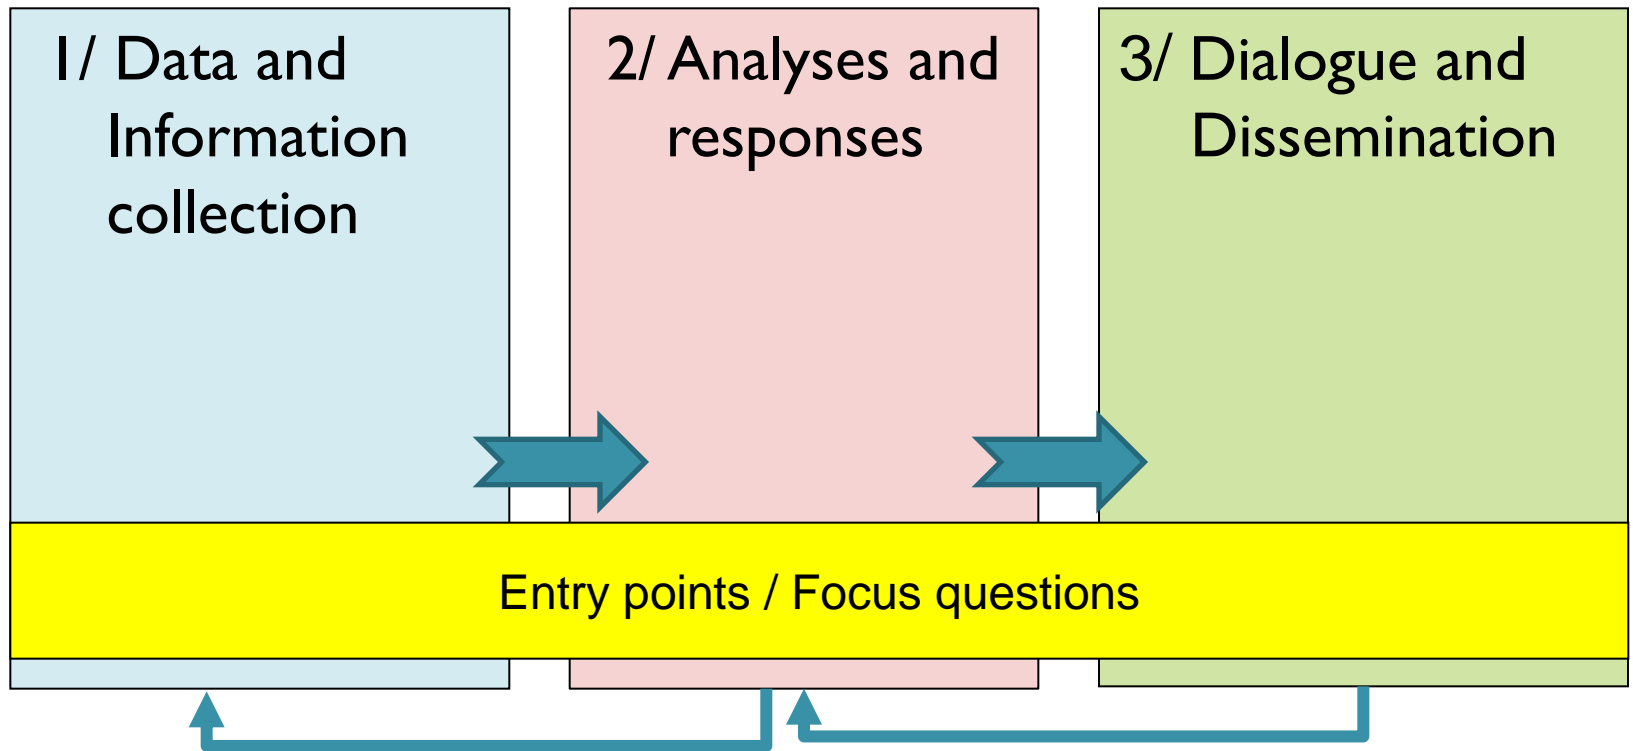

Methodology

Livestock Monitoring System : animation (or pilot) body

Methodology

Livestock Monitoring System : animation (or pilot) body

I / Thematic questions

Entry points

Focus questions

- Production structures **Efficiency**
(economic, environmental, social indicators)
- Local territories **Re-localization**
(local planification)
- Marketing chains **Re-organization**
(feed market regulation)

2/Questions relat. to data collection

- Data collection

I/ Data and
Information
collection

- **Secondary Data**

- GSO (production, trade, etc...) and MARD routine surveys
- To be improved through minor changes
- Improve accessibility of data-sets

- **Primary Data**

- Specific studies

2/Questions relat. to data collection

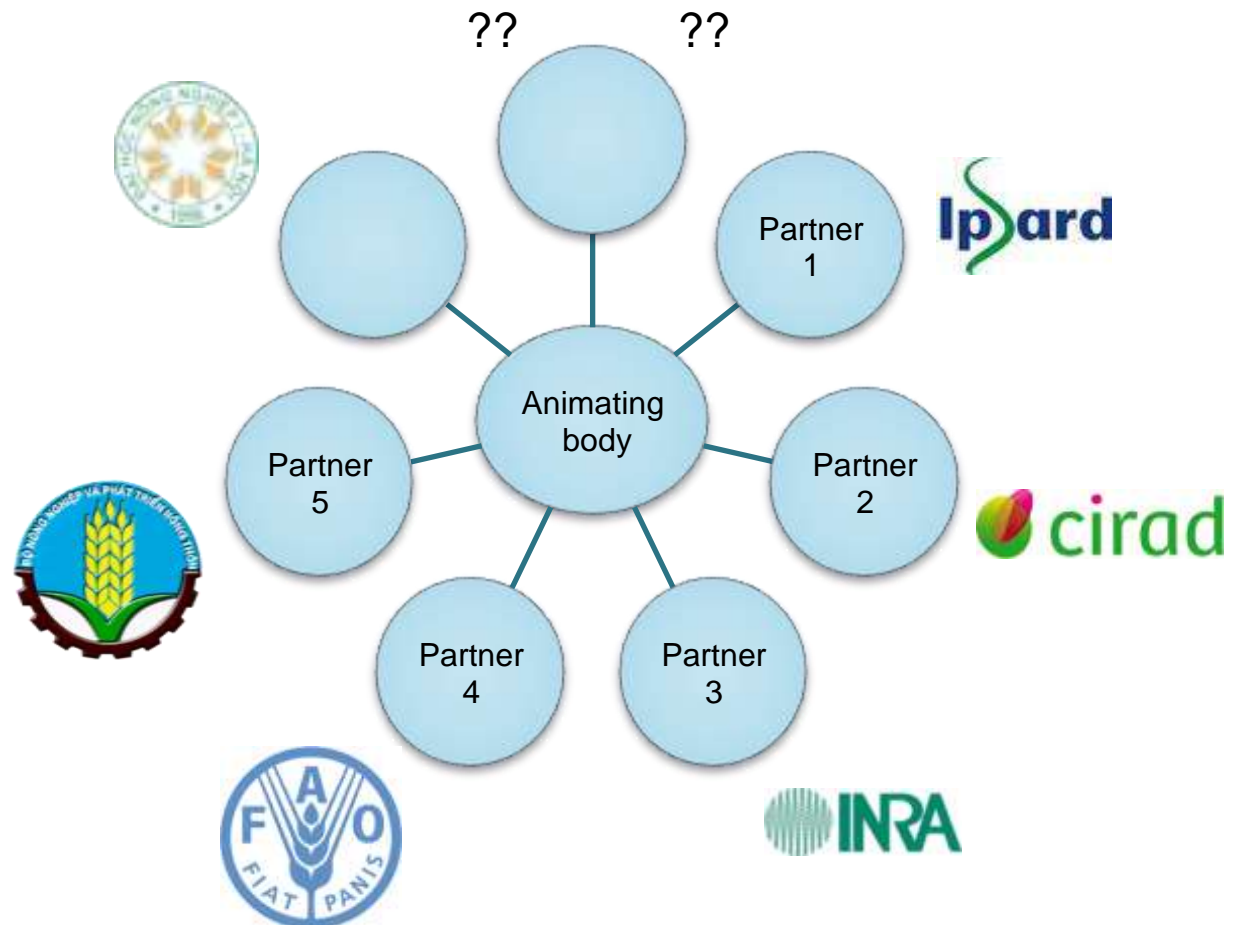

I/ Data and Information collection

- Whole country: National coverage
- Restricted zones : Pilot areas

3/ Partnership questions

- Institutional framework

3/ Partnership questions

- Dialogue
 - National:
 - Bulletin (every 3 months)
 - Web site
 - Conferences
 - Publications
 - Annual workshop
 - Provincial:
 - Regular meetings
 - Publications

3/ Dialogue and
Dissemination

3/ Partnership questions

Welcome to our Site

The Livestock Policy Monitoring System in Vietnam
[16-05-2011].
Throughout the world, and particularly in Southeast-Asia, livestock systems are changing very rapidly, due to the increased demand for animal products. This "livestock revolution" has been characterized by unexpected rates of growth of animal production in the region.
